SKILLS

Programming Languages:

Java, C, Python, HTML, MySQL, VHDL, Scala

Software:

Visual Studio Code, MATLAB, Excel, Word, After Effects ...

Languages:

- French: Native
- English: Advanced
- Chinese: Intermediate

SOFT SKILLS

Curious
Conscientious
Logical Thinking
Team Player

INTERESTS

Emerging technologies

Video and photo editing

Music: 8 years of piano, passionate about music

Asian culture

Sports: Catamaran, Judo, Badminton, Football

PROFILE

Engineering student (5th year) at an engineering school, I am moving towards a specialization in data and artificial intelligence for the end of my curriculum. Having always been passionate about statistics and new technologies, my goal is to continue developing my knowledge in this field of analysis and artificial intelligence to become a data scientist.

EDUCATION

EFREI PARIS - Engineering Student — 2023 - Present

Courses: Algorithms, Web Programming, Databases, Machine Learning, Cloud Computing, Probability, Data Analysis, Data Visualization and Deep Learning.

Projects: Website creation with database integration, probabilistic data analysis using machine learning algorithms then upgraded using deep learning.

CPGE : MPSI, Lycée J-B Corot — 2022 - 2023

Courses: Algebra, Analysis, Probability, Thermodynamics, Mechanics, Electricity, Python, Computational Complexity.

Project (TIPE): Comparison of programs simulating various strategies to find an optimal solution.

A-Level, Lycée Léonard de Vinci — 2022

Graduated with **high honours**.

Specializations: Mathematics, Physics-Chemistry

Options: Advanced Mathematics, DNL (Science in English)

PROFESSIONAL EXPERIENCE

Data Science Intern - LAERO, Toulouse — Dec - Apr 2026

Full Matlab-to-Python migration of the data processing pipeline for the BOREAL atmospheric drone, including binary extraction, data cleaning (IQR, interpolation), a Streamlit dashboard (2D/3D, FFT/multitaper spectral analysis), and a tkinter GUI. Vibration analyses delivered to M3 Systems.

Sales Internship at DARTY — January 2024

Discovery of the professional world and introduction to the relational field. Learning communication methods (identifying the interlocutor), sales techniques (funnel) and understanding the client's needs.
